# MOSTY BROTHERS NURSERIES

---

With pleasure we desire to thank all our customers of the past for their patronage and good will, which has made us successful during more than 43 years in Kerr County. We feel that we need no introduction to the people of the Hill Country of Texas.

During the last two decades, we have made a specialty of growing the newest and choicest evergreens, ornamental trees, shrubs and everything for the beautifying of the home grounds, public buildings, parks, etc. We have the most complete assortment of choice and scarce evergreens growing in Texas. We have a stock of more than 500,000 evergreens in more than 100 varieties; thousands of roses and fruit trees suitable to our soil and climate.

The favorable soil rich in minerals; climatic conditions, due to our altitude and dry atmosphere, make our evergreens and all plants, etc., much hardier than those grown in a warmer and more humid climate. Time-tested policies and methods and the wealth of individual accumulated experience, gathered during more than 43 years of successful operation in Southwest Texas, combine to enable us to offer our products in full confidence to both professional and amateur alike.

The difference in cost between good evergreens, trees, etc., and poor ones is slight; yet once they are planted, the character of the landscape and orchard is fixed, neither fertility of soil, water, care or expense can lift it to the level which original quality would have made possible. A sickly blooming rose or shy bearing tree, a thin branched, poor specimen evergreen is but a living disappointment. The buyer must rely upon the professional knowledge and experience of the men operating the nursery.

"As the planting, so shall the harvest be."

TERMS CASH on or before delivery payable at Kerrville, Texas, or Center Point, Texas.

INSPECTION CERTIFICATE of health from the state will be on every shipment. All stock is native grown and adapted to our soil and climate.

## OUR LANDSCAPE SERVICE

There never was a true home without a garden. The green plant growing in an ash can in city tenement, the wan bloom so tenderly reared in the shadowed prison cell, the fountained and terraced estates of kings, all express alike our human need for the companionship of nature.

Our landscape service will solve your problem quickly, correctly and even more economically. The amount you spend is of less importance than what you plant and where you plant it. For instance, \$75.00 worth of evergreens, trees, etc. properly selected and correctly placed about your grounds will produce effects you may not be able to equal, although you spend several times that amount; and using plants adapted to the purpose will increase in value and beauty with age. For the average planting, we will be glad to advise you in laying out and planning your grounds in a pleasing way. For this service, we make no charge if we furnish the planting material.

We maintain the services of competent landscape architects. These men all have college degrees in their

profession, plus years of practical experience. Some of them have had experience with the National Park Service, as well as having been employed on landscape projects for public institutions. These men are capable of preparing preliminary sketches and final drawings in the form of blue prints, which may be accompanied by specifications and planting instructions. These drawings show the proper grades for lawns and terraces, proper lay-out and construction of walks, drives, pools, sprinkler systems, gardens and other features in the project. The planting plans show the name, grade and location of each shrub or tree, together with planting instructions where necessary. All minute details requisite to a landscape project of the very highest order will be handled by our landscape department for you. Consultation with one of our landscape architects costs you nothing and incurs no obligation on your part. Write or call us.

Soil analysis, tree surgery, and scientific feeding.

Complete landscape service, experienced men, modern tools and equipment.

Rearrangement of your present plantings, sodding, remodeling and making a modern landscape, all at very reasonable costs.

With our natural advantages, the use of only high class labor, under our personal direction, in the growing, grafting, pruning, cultivating and last, the digging and packing, we are prepared to supply the very best that money can buy.

Orders given us will receive our personal attention in selection, digging, packing and handling.

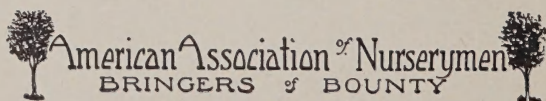

We respectfully solicit your business.

Yours truly,

MOSTY BROTHERS.

**ORDER EARLY**—While we have a more complete stock than for several years past, it will be to your advantage to order early. Chances of success are much better when planting is done at the right time. We cannot come to solicit orders from everyone, and ask that you will write or call personally.

**WE GUARANTEE** all our stock to be vigorous and healthy, well packed, in good condition to grow and true to name. Should any prove otherwise, we will replace same, free of charge, but it is mutually agreed that we assume no further responsibilities. Nursery stock that fails to live will be replaced at one-half price, providing said plants were properly cared for by the purchaser.

# BROADLEAVED EVERGREENS

## EVERGREEN DEPARTMENT

All plants in this department are priced balled and burlapped (balled in earth) unless otherwise noted, F. O. B. nursery.

### ABELIA GLOSSY (*A. Grandiflora*) B&B

Flowers white, flushed lilac pink. Blooms profusely and continuously from May to frost. Foliage glossy green, turning to a Glossy bronze-green during the winter. This is one of our very best plants for foundation work, massing and grouping, and a most beautiful hedge plant. Also a very handsome specimen plant. Very hardy. Comes from China.

18 to 24 inches high, each.....	\$1.00
2 to 3 feet high, each.....	1.50
3 to 4 feet high, each.....	2.50
Larger specimen plants.....	\$3.00 and Up

**BARBADO CHERRY** (*Malphia Glabra*) B&B. Small shrub, pointed light green leaves. Small pink flowers in profusion, followed by bright red berries. Evergreen from San Antonio south. A native of South Texas.

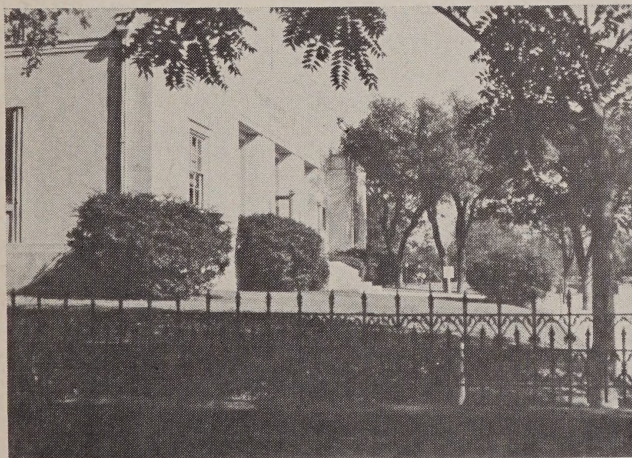

15 to 18 inches, each .....	\$ .75
18 to 24 inches, each .....	1.00

**BARBERRY—RED LEAF** (*Berberis Atropurpurea*) B&B. Comparatively low growing shrub, slightly thorny, deciduous. Leaves deep red in summer. An excellent shrub for summer color effect.

12 to 15 inches, each .....	\$1.00
15 to 18 inches, each .....	1.25
Larger sizes, each.....	1.50 and Up

**BUTTERFLY BUSH** (*Buddleia*) B&B. We have the improved varieties, Hartwegi, Lindley, etc. Well known, hardy, flowering shrub. Blooms profusely. Bright purple or lilac colored spikes. Very fragrant. Plant in full sunshine. From Japan.

Plants from gallon cans, each.....	\$ .75
Larger sizes, each.....	1.00 and Up

The United States Post Office at Kerrville, Texas.

**BOX DWARF JAPAN** (*Buxus Semperviens Japonica*) B&B. Extremely slow, very compact. Good for shaded locations.

8 to 10 inches high, each .....	\$1.00
10 to 15 inches high, each.....	2.00

**CAPE JASMINE** (*gardenia floridus*) B&B. Double wax-like flowers, exquisitely fragrant. Dark glossy leaves. Low shrubs. If they turn yellow, work two pounds coperas and one-fourth pound amonium sulphate in the soil around each plant. Peat moss is very desirable. From China.

12 to 18 inches high, each .....	\$1.25
18 to 24 inches high, each .....	1.50
24 to 36 inches high, each.....	2.50
Larger specimen plants.....	3.50 and Up

**CAPE JASMINE DWARF** (*Gardenia Radicans Veitchi*) B&B. Very small dwarf evergreen. Rather small, dark green leaves. Pure white, very fragrant flowers. Must have an acid soil such as all Cape Jasmines require.

Plants in gallon cans, each.....	\$ .75
----------------------------------	--------

**CYDONIA**—See Flowering Quince. Page 6.

**CENIZA** (*leucophyllum* or purple sage) B&B. Purplish pink flowers. Ashy gray leaves. Native to southwest Texas. Very hardy. Planted extensively on roadside plantings by Texas Highway Department. Stands adobe and alkaline soils perfectly. The word "ceniza" is the Spanish word for ashes. Sometimes erroneously spelled "senesa."

Gallon cans, each.....	\$ .75
18 to 24 inches high, each.....	1.00
2 to 3 feet high, each.....	1.50
3 to 4 feet high, each.....	2.50
Larger specimen plants, each.....	3.50 and Up

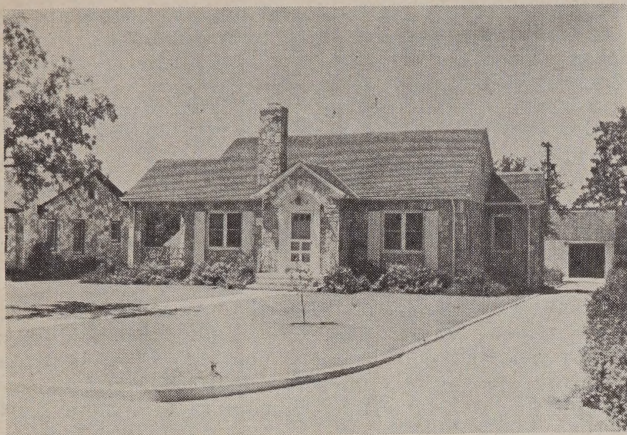

**COTONEASTER FRANCHET** (*C. Franchieti*) B&B. Medium tall graceful branching habit; flowers white; berries, rose red. The hardiest variety we have. Comes from China.

18 to 24 inches high, each.....	\$1.25
2 to 3 feet high, each.....	1.75
3 to 4 feet high, each.....	2.50
Larger specimen plants, each.....	3.50 and Up

The City Hall at Kerrville, Texas.

A modern small home well designed and pleasingly planted.

**COTONEASTER SILVER LEAF** (*C. panosa*) B&B. Small white flowers followed by clusters of scarlet berries in winter. Leaves ashy color on under sides, giving plant a soft, grayish color effect. Graceful habit.

Same grades and prices as Franchetti.

**COTONEASTER PARNAY** (*c. parneyi*) B&B. Larger dark green heavy foliage. Very desirable.

Same grades and prices as Franchetti.

**COTONEASTER ROCK** (*C. Horizontalis*) B&B. Very low, slow grower. Quite small leaves. White flowers followed by small red berries. Desirable for rock gardens.

Plants in gallon cans, each.....\$1.00

**ELEAGNUS FRUITLAND** (*E. Fruitlandi*) B&B. Stocky, spreading shrub. Slightly spiny. Leaves green, dotted with silver scales on upper sides and silvery beneath. Very hardy. Small flowers. Very fragrant. From China.

18 to 24 inches high, each.....\$1.50

2 to 3 feet high, each.....2.50

3 to 4 feet high, each.....3.50

Larger specimen plants, each.....5.00 and Up

**ELEAGNUS SIMON** (*pungens simoni*) B&B. Smaller leaves and slower grower than Fruitlandi. From Japan.

Same grades and prices as Fruitlandi.

**ELEAGNUS BROADLEAF** (*E. Marcophylla*) B&B. Larger leaves. Faster grower. Very hardy. From China.

Same grades and prices as Fruitlandi.

**EUONYMUS DWARF BOX** (*E. Pulchillis*) B&B. Used in window boxes, for edgings and low borders. Very small leaves. Very slow compact grower.

6-inch plants, each 35c; dozen.....\$3.50

**EUONYMUS GOLDSPOT** (*E. aurea variegata*) B&B. Compact upright growth. Shiny green leaves with bright golden markings. Very attractive and hardy.

12 to 18 inches high, each.....\$1.00

18 to 24 inches high, each.....1.50

Larger specimen plants.....\$2.00 and Up

**EUONYMUS JAPAN** (e. japonica) B&B. Green glossy leaves, upright grower. Will cling against walls, chimneys, etc. May be sheared to any form. One of our most popular, hardy evergreens. Makes a most beautiful low, compact hedge where a more elaborate effect is desired. From Japan.

18 to 24 inches high, each.....	\$ .75
2 to 3 feet high, each .....	1.00
3 to 4 feet high, each.....	2.00
4 to 5 feet high, each.....	3.00
Larger specimen plants.....	4.00 and Up

**FEIJOA SELLOWIANA** (Pineapple Guava) B&B. Silvery green leaves; spreading habit; flowers, white waxy petals, purple crimson centers. Fruit delicious, mingling flavor of pineapples, raspberry and banana; imparts a very pleasing fragrance in a room or trunk. From South America.

18 to 24 inches high, each.....	\$1.00
2 to 3 feet high, each.....	1.50
3 to 4 feet high, each.....	2.50
Heavy specimens, each.....	4.00 and Up

**FLOWERING QUINCE** (cydonia Japonica) B&B. Brilliant scarlet flowers very early in the spring. Not an evergreen. Grafted plants true to color. From Persia.

18 to 24 inches high, each.....	\$1.00
2 to 3 feet high, each.....	1.50
3 to 4 feet high, each.....	2.50

**FIRETHORN**—See *Pyracantha* on Pages 13-14.

**GARDENIA**—See Cape Jasmine on Page 4.

**GOLDFLOWER**—See *Hypericum* on Page 7.

**GUAVA**—See *Feijoa* on Page 6.

**HOLLY BUFORD** (*Ilex Bufordii*) B&B. By far the most beautiful of all hollies. Beautiful, dark, glossy green leaves, not spiny. The berries are large and heavy and of a beautiful brilliant red. Very slow grower.

15 to 18 inches high, each .....	\$2.50
18 to 24 inches high, each.....	3.50
Larger sizes, each.....	4.50 and Up

**HOLLY CHINESE** (*Ilex Cornuta*) B&B. Upright grower, leaves very full of spines. Bright red berries. Very desirable in foundation plantings and makes a beautiful specimen. The best holly for black soil. Stands alkali well.

18 to 24 inches high, each .....	\$2.00
2 to 3 feet high, each.....	3.00
Larger sizes, each.....	4.00 and Up

**HOLLY DAHOON** (*Ilex Cassine*) B&B. Upright grower. Narrow olive-green leaves three inches long. Bears red berries profusely. Very attractive.

Same grades and prices as Chinese Holly.

**HOLLY AMERICAN** (*Ilex Opaca*) B&B. Commonly known as the Christmas Berry Holly. Leaves full of spines. Native of the South.

Same grades and prices as Chinese Holly.

**HOLLY YAUPON** (*Ilex Vomitory*) B&B. Shrub with low spreading branches. Small dark green leaves. Small white flowers, followed by scarlet red berries in winter. Native of south and east Texas.

Same grades and prices as Chinese Holly.

**HONEYSUCKLE Pinkglow** (*Lonicera Heckrottii*) B&B. Evergreen bush honeysuckle. Everblooming. Flowers cream inside, bright pink outside. Very attractive and popular. Very hardy, stands alkali soils, heat and cold perfectly.

18 to 24 inches high, each.....\$1.00  
2 to 3 feet high, each..... 1.50  
Larger sizes, each.....2.00 and Up

**HONEYSUCKLE Orangeflame** (*Lonicera Belgica*) B&B. Low growing, everblooming evergreen shrub. Flowers gold inside and red before opening. Similar to above except in habit of growth.

Same grades and prices as Pinkglow.

**HONEYSUCKLE VINES**—See Page 28.

**HEDGES**—See Page 23.

**HYPERICUM Mostly Golden Glow** (*Goldflower*) B&B. Low spreading evergreen shrub, light green compact foliage. Blooms profusely, large yellow flowers. Highly tolerant of alkaline soils. Excellent for low groups and massing. Without question, the most beautiful and popular low-growing, dwarf, flowering broadleaf evergreen. No planting complete without this plant. Our own introduction.

12 to 15 inches high, each.....\$1.00  
15 to 18 inches high, each ..... 1.25  
Larger sizes, each ..... 1.50 and Up

**HYPERICUM (Moseranium)** B&B. Common variety sold by most nurseries. Not desirable in most parts of Texas unless planted in favorable locations. Yellow flowers.

15 to 18 inches high, each..... \$ .60  
18 to 24 inches high, each ..... .80  
Larger sizes, each.....1.00 and Up

**ILEX**—See Holly on Page 6.

**JASMINE Italian** (*Jasminum Floridum*) B&B. Rich dark green foliage, bright yellow star-shaped flowers in profusion all summer and fall. Strong and vigorous. Very fine for low massing and used for base planting around tall plants or groups. Very hardy. Will thrive in any soil, including alkaline and limey soils. Stands shade or sunshine. Our finest low-growing, flowering evergreen. From Asia.

18-inch spread, each.....\$ .75  
2-foot spread, each..... 1.00  
3-foot spread, each..... 1.50  
Larger specimens, each.....2.50 and Up

**JASMINE PRIMROSE** (*J. Primulinum*) B&B. Larger leaves and faster grower than *Floridum* though not as hardy. Blooms in late winter.

Same grades and prices as Italian Jasmine.

**JAPONICA**—See Flowering Quince on Page 6.

**JAPONICA**—See Flowering Quince on Page 6.

**JAPONICA**—See Euonymus on Pages 5, 6.

**LAUREL English** (*laurocerasus officinalis*) B&B. A fine shrub with broad shiny leaves. Slow grower. From southeast Europe to North Persia.

18 to 24 inches high, each.....\$2.00  
 2 to 3 feet high, each..... 3.00  
 Larger specimen plants.....5.00 and Up

**LAUREL Southern Cherry** (*laurocerasus caroliniana*) B&B. Pyramidal upright grower, forming a tall pointed, towering effect. Firm dark green leaves. Small fragrant flowers early in spring, followed by greenish-black fruit. Our best broad-leaved evergreen for high points. Very hardy. Native from North Carolina to Texas.

2 to 3 feet high, each.....\$1.50  
 3 to 4 feet high, each..... 2.00  
 4 to 5 feet high, each..... 3.00  
 Larger specimen plants, each.....4.00 and Up

**LAVENDER English** (*lavendula vera*) B&B. Small compact, round top plant, with narrow, sage-like, gray, downy leaves. Very aromatic. Blue flowers. The true sweet lavender. From India.

12 to 15 inches high, each.....\$ .60  
 15 to 18 inches high, each ..... .75  
 18 to 24 inches high, each..... 1.00

**LAVENDER Cotton** (*santolina*) B&B. Much used in old fashioned gardens for very low borders. Makes good ground cover. Silver gray foliage. Very aromatic. Hardy. Good for rock gardens.

Same grades and prices as English Lavender.

For those who desire a more formal effect. Note the massing of spreading shrubs against the house. The addition of the clipped hedge produces the formal effect.

**LIGUSTRUM Bushy (Ligustrum Japonica) B&B.** Glossy, green foliage, white flowers in June followed by blue berries. Vigorous and fast grower. Used for heavy planting, screens and windbreaks. Hardy. From Japan.

2 to 3 feet high, B&B, each.....	\$ .75
3 to 4 feet high, B&B, each.....	1.00
4 to 6 feet high, B&B, each.....	2.00
6 to 8 feet high, B&B, each.....	3.00
Heavy specimen plants, each.....	4.00 and Up

For Hedges, see bare-root prices on Pages 23, 24.

**LIGUSTRUM Trees—See Page 30.**

**LEUCOPHYLLUM—See Ceniza on Page 4.**

### **LUCIDUMS (Spreading Varieties)**

**LUCIDUM WAX (Compact Wax Lucidum) B&B.** One of the handsomest and most popular broad-leaved evergreens grown. Medium grower, compact, graceful habit; large glossy green leaves. White flowers in June. Valuable for heavy massing or grouping, foundation work or as a single specimen. Also makes a most beautiful hedge.

15 to 18 inches spread, each.....	\$ .80
18 to 24 inches spread, each.....	1.25
24 to 30 inches spread, each.....	1.50
Larger specimen plants .....	\$2.00 and Up

**LUCIDUM Nepalenese (Nepals Waxleaf) B&B.** Beautiful spreading type of Wax. Graceful grower. Foliage glossy green. Very similar to Lucidum Wax. Same grades and prices as Lucidum Wax.

The result of poor design and skimping. These shrubs are too small to produce much effect. They are methodically equally spaced about the house rather than grouped. The front walk is unnecessarily curved and unduly emphasized by the planting on each side. The addition of two or three larger shrubs and the elimination of the shrubs along the walk would tend to improve the effectiveness of this planting to a great extent.

## LUCIDUMS (Upright Varieties)

**LUCIDUM CRINKLY LEAF** (*l. repandens*) B&B. Upright growth. Dark green pointed leaves. Heavy foliage set close together on branches.

2 to 3 feet high, each.....\$1.50

3 to 4 feet high, each.....2.50

Larger specimen plants.....4.00 and Up

**LUCIDUM UPRIGHT** (*ligustrum gracillis*) B&B. Dark glossy, green leaves. Compact upright grower. White flowers in June. Very desirable for high places in foundation planting or groups. Hardy.

Same grades and prices as Crinkly Leaf Lucidum.

**LUCIDUM Black Wax** (*Lucidum Nigrafolia*) B&B. Similar to Compact Wax except that it is more of an upright grower and the leaves are darker green.

Same grades and prices as Crinkly Leaf Wax.

**LUCIDUM BOX** (*Henryii*) B&B. Small leaves, very glossy, light green. Compact grower. Shears easily. Used as a substitute for Boxwood when sheared.

Same grades and prices as Crinkly Leaf Wax.

**LUCIDUM Ionandrum** B&B. Very similar to Box Lucidum. Compact, upright growth. May be sheared to any form.

Same grades and prices as Crinkly Leaf Wax.

**PRIVET LODENSE** (*Ligustrum Nanum Compactum*) B&B. Compact and low, very slow grower. Leaves small, dull, dark green. Tolerant of alkali. A good substitute for English Boxwood. Excellent for dwarf hedges.

12 to 15 inches, each.....\$.60

15 to 18 inches, each......75

For Hedges, see bare-root prices on Pages 23, 24.

In this planting annuals and perennials are interspersed with the foundation planting to add color. The house is more adequately framed by the addition of the tall tree on the right.

**PRIVET Baby Doll—B&B.** Similar to Amoor River Privet except smaller leaves. Slow grower and very compact.

18 to 24 inches high, each.....	\$ .75
2 to 3 feet high, each.....	1.00
Larger specimens, each.....	1.50 and Up

**PRIVET AMOOR RIVER (*Ligustrum Chinensis*) B&B.** Sheared cone shape, very compact and full.

Same grades and prices as Baby Doll.

**PRIVET AMOOR RIVER (*Ligustrum Chinensis*) B&B.** Natural grown plants, not sheared.

2 to 3 feet high, each.....	\$ .50
3 to 4 feet high, each.....	.75
Larger sizes, each.....	1.00 and Up
For Hedges, see bare-root prices on Pages 23, 24.	

**LOQUAT (*eriobotrya Japonica*) B&B.** Large handsome leaves; sturdy, vigorous grower; somewhat spreading. Very attractive. From South Asia.

18 to 24 inches high, each.....	\$1.00
24 to 30 inches high, each.....	1.50
30 to 36 inches high, each.....	2.00
3 to 4 feet high, each.....	3.00
Larger specimen plants.....	4.00 and Up

**LIVE OAKS—See Page 30.**

**MAGNOLIA (m. *Grandiflora*) B&B.** Well known ever-green. Large, glossy, green leaves. Sturdy upright, spreading grower. We have the tree form and bush form. Very attractive as specimen or grouping. Hardy

This might have been an otherwise fair planting had it not been entirely ruined by all-too-common pruning practices. These shrubs have been trimmed and sheared until they have lost all semblance and beauty of their natural form. This planting appears artificial and entirely inconsistent with good landscape design. The plants should have been allowed to merge together in their natural habit of growth to form a unified planting.

as far north as Kansas. Native from North Carolina to Texas.

18 to 24 inches, each .....	\$1.50
2 to 3 feet high, each .....	2.00
3 to 4 feet high, each .....	3.00
4 to 6 feet high, each .....	4.00

Larger specimen plants.....7.50 and Up

**MAGNOLIA Galuca (Sweet Bay Tree) B&B.** Similar to *Grandiflora*. Smaller leaves which are a glossy, bluish-green. Large white flowers, very fragrant.

Same grades and prices as *Magnolia Grandiflora*.

**MAGNOLIA Chinese (M. Liliflora) B&B.** A deciduous *Magnolia*. Very large, tulip-shaped flowers, purple outside and purplish-pink inside. Blooms very early before leaves appear. From China.

2 to 3 feet high, each .....	\$4.00
Larger sizes, each .....	5.00 and Up

**MAGNOLIA Chinese (Soulangena) B&B.** Same as *Liliflora* except flowers are pink outside and white inside. From China.

Same grades and prices as *Liliflora*.

**MAHONIA, Oregon Hollygrape (M. Aquifolia) B&B.** Low spreading growth. Holly-like foliage. Dark bronze green. Small yellow flowers. Slow grower.

12 to 15 inches high, each .....	\$1.25
15 to 18 inches high, each .....	1.50
Larger sizes, each .....	2.00 and Up

**MALPHIGIA Glabra (Barbado Cherry)—See Page 3.**

**MYRTLE, Roman (Myrtus communis) B&B.** Small, shiny, green leaves. Very aromatic. White flowers and black berries. Graceful, medium grower. Does not stand hard freezing, but soon grows out again.

Plants from 8-inch pots, each .....	\$1.00
Larger field grown plants, each .....	1.50 and Up

**MYRTLE Compact Roman (M. microphylla compact) B&B.** Same as Roman Myrtle except smaller leaves and more compact grower. From the Mediterranean region.

Same grades and prices as Roman Myrtle.

**MYRTLE Sweet (M. microphylla) B&B.** Smaller leaves and slower grower than Roman Myrtle. Otherwise the same.

Same grades and prices as Roman Myrtle.

**NANDINA (N. domestica) B&B.** Beautiful upright grower. The delicate foliage is red when young, dark green when mature, assuming beautiful coppery bronze to fiery red tones in winter; also covered with bright red berries. Assumes brighter color if planted in sunny location. Very desirable for bright colors in any planting. Much used in foundation work, under windows, etc. Makes most attractive hedge. Also

beautiful specimens. Very hardy. From China and Japan.

8 to 12 inches high, light, each.....	\$ .50
12 to 18 inches high, medium, each.....	.75
18 to 24 inches high, medium, each.....	1.00
2 to 3 feet high, medium, each.....	1.50
12 to 18 inches high, heavy, each.....	1.00
18 to 24 inches high, heavy, each.....	1.50
24 to 30 inches high, heavy, each.....	2.00
30 to 36 inches high, heavy, each.....	2.50
Larger specimen plants, each.....	3.00

For extra heavy specimen plants, add 50 per cent to above prices on each heavy grade as listed.

**OLEANDER (Nerium) B&B.** Well known flowering shrubs. Very attractive.

2 to 3 feet high, each.....	\$1.50
-----------------------------	--------

**OREGON GRAPE**—See Mahonia on Page 12.

**PHOTINIA (P. dentata) B&B.** Handsome strong growing upright sturdy shrub. Large glossy green leaves, slightly spiny and somewhat crinkled edges. Young growth colors highly early in the spring and late fall. Very attractive when mixed in with other evergreens. Large heads of pure white flowers early in the spring.

18 to 24 inches high, each.....	\$1.25
24 to 30 inches high, each.....	1.50
30 to 36 inches high, each.....	2.00
3 to 4 feet high, each.....	2.50
4 to 5 feet high, each.....	3.50

**PHOTINIA LOW (P. Serrulata) B&B.** More spreading than Dentata. Otherwise the same. From China.

Same grades and prices as Dentata.

**PITTOSPORUM (P. tobira) B&B.** Dense globular shrub, dark glossy green leaves, small white flowers, resembling orange blossoms. Will not stand hard freezing. Hardy at San Antonio and South.

Plants from 8-inch pots, each.....	\$1.00
Plants from 10-inch pots, each.....	1.50
Larger plants, each.....	3.00 and Up

**PITTOSPORUM SILVER (P. tobira marginatum) B&B.** Same as above except leaves are marked with bright silver spots. Very attractive. From Japan.

Plants from 6-inch pots, each.....	\$1.25
Plants from 10-inch pots, each.....	2.00

**PRIVET HEDGES**—See Pages 23, 24.

**PYRACANTHA LALANDI**—(Firethorn) B&B. Upright strong grower. White flowers in spring, followed by bright orange colored berries during the winter. The Pyracantha is identical with hawthornes, except they are evergreens. Small dark green leaves. Plants are very thorny and should be planted where they have plenty room. Much more satisfactory than the hollies and give the same effect with the blooms and berries. This is the hardiest variety of the Prycanthas. From southeast Europe to South Asia.

Plants from 6-inch pots, each.....	\$ .75
From 10-inch pots, each.....	1.50
Field grown, 2 to 3 feet high, each.....	1.50
Larger sizes, each.....	2.50 and Up

**PYRACANTHA LALANDI COCCINEA (Firethorn) B&B**  
 B. Same as above except is a robust spreading grower. White flowers and orange berries.

Same grades and prices as Lalandi.

**PYRACANTHA ROGERS (Firethorn Rogeri) B&B.** Yellow berries, very similar to Coccinea.

Same grades and prices as Lalandi.

**PYRANCANTHA YUNNANENSIS (Firethorn) B&B**

Vigorous robust spreading grower. White flowers followed by orange-colored berries in the fall, which turn to a bright red in winter. All Pyrancanthas are very desirable for bird sanctuaries.

Same grades and prices as Lalandi.

**POMEGRANITE Dwarf (Punica Granatum Nana) B&B**

Very small compact plants with bright red flowers. Evergreen from San Antonio south. From India.

Plants in gallon buckets, each.....\$ .75

**QUINCE Flowering.** See Flowering Quince on Page 6.

**ROSEMARY (rosmarinus officinalis) B&B**

Sage-like leaves, highly aromatic. Silver grayish color. Small white flowers. Low grower. Very hardy for hot, dry locations. From Southern France.

12 to 18 inch spread, each.....\$ .75

18 to 24 inch spread, each..... 1.00

**SANTOLINA—See Lavender Cotton on Page 8.**

**SENEA—See Ceniza on Page 4.**

In this planting, emphasis is on the doorway, a prominent architectural feature of the house. Note the variation in line, which builds up to and accents the entrance. A good informal planting.

**SWEETPEA EVERGREEN (*Lathrus Latifolia*) B&B**

A low trailing evergreen, flowers red, pink and white. Very hardy, will stand low temperatures, heat and alkaline soils. A most attractive and useful evergreen and should be used more extensively.

18 to 24 inch spread, each.....\$ .75

**TEUCRIUM CHAMAEDRYS (Germander) B&B**

Very slow growing, dwarf, flowering evergreen. Very small dark green leaves. Flowers red, purple or bright rose with red and white spots. Very desirable and hardy.

15 to 18 inches high, each.....\$ .60

18 to 24 inches high, each......80

Larger sizes, each.....1.00 and Up

**VIBURNUM LEATHERLEAF (*V. rhytidophyllum*) B&B**

Erect grower, long rough green leaves with copper color on under sides and on young growth. Odd, very rare and attractive. Very hardy, stands heat, cold, drouth and alkaline soils. Very desirable with Spanish architecture. From China.

15 to 18 inches high, each.....\$1.25

18 to 24 inches high, each.....1.50

24 to 30 inches high, each.....2.50

Larger plants, each.....3.00 and Up

**VIBURNUM SWEET (*V. odoratissima*) B&B**

Stout upright bushy shrub, shiny leaves, white flowers. Thick, glossy, dark green, large leaves. Very attractive. Comes to us from India.

Same grades and prices as Leatherleaf Viburnum.

This is the result of the misuse of vertical lines. These pyramidal evergreens are comparable to a series of exclamation points. The attention is unduly focused on the shrubs, creating distortion rather than composition. The perpendicular line should be used as an emphasis or accent only, therefore they should be used sparingly.

**VIBURNUM SUSPENSUM (V. Sandankwa) B&B**

Large leaves and more spreading than most viburnums. Leaves somewhat wrinkled, flowers cream colored and fragrant, followed by red berries. Stands shade and is hardy from San Antonio south. Comes from South China.

Same grades and prices as Leatherleaf Viburnum.

**VIBURNUM TINUS (Laurustinus) B&B**

Winter blooming evergreen shrub. Flesh-colored flowers. Upright grower. Will not stand zero weather. Comes from the Mediterranean region.

Same grades and prices as Leatherleaf Viburnum.

**CONIFER EVERGREENS****ARBORVITAE**

(Dwarf Varieties)

**DWARF GLOBE ARBORVITAE** (*thuja orientalis bonita*) B&B. Very slow compact grower, globe shaped, dark green color. Very desirable for urns, pedestal, etc.

12 to 15 inches high, each .....	\$ .75
15 to 18 inches high, each .....	1.00
18 to 24 inches high, each .....	1.50
Larger specimens, each .....	\$2.00 and Up

**DWARF GOLDEN GLOBE** (T.O. *Aurea Globosa Nana*) B&B. Almost identical as Dwarf Globe, except bright golden color. One of the newer varieties.

Same grades and prices as Dwarf Globe.

**DWARF GOLDEN ARBORVITAE** (Berckmans Dwarf Golden) B&B. Dwarf compact grower, very symmetrical. Tips of all branches assume bright golden tints; used extensively for grouping in front of the taller specimens; very hardy; retains beauty with age. Most popular arborvitae.

15 to 18 inches high, each .....	\$1.00
18 to 24 inches high, each .....	1.25
24 to 30 inches high, each .....	1.50
30 to 36 inches high, each .....	2.00
Larger specimen plants, each .....	\$3.00 and Up

**DWARF COMPACT ARBORVITAE** (T.O. *mayhew compacta*) B&B. Same dwarf habit of growth as Golden. Darker green color at all times of the season.

Same grades and prices as dwarf Golden.

**BLUE GREEN ARBORVITAE** (T.O. *glauca compacta*) B&B. Compact grower, fresh blue-green color. Very desirable for color effects in Conifer groups.

18 to 24 inches high, each .....	\$ .80
24 to 30 inches high, each .....	1.00
30 to 36 inches high, each .....	1.25
Larger specimen plants, each .....	\$1.50 and Up

**RETINOSPORA** (*r. leptoclata*) B&B. Dense round-headed, dwarf growing plant with bluish green foliage, changing to bronze or steel color in winter. A beautiful rich autumn color not found in any other plant.

Same grades and prices as Blue Green Arborvitae.

**ROSEDALE—B&B.** Bluish green color, turning to autumn colors in winter. A hybrid arborvitae.

Same grades and prices as Blue Green Arborvitae.

(Tall Growing Varieties)

**GOLDSPIRE ARBORVITAE (T.O. aurea conspicua)**  
B&B. Upright pyramidal grower. Foliage tinted with bright golden color, changing to rich coppery autumn colors in winter. Can be used in any location where bright color is desired. Very attractive and rare.

3 to 4 feet high, each .....\$2.50

4 to 5 feet high, each ..... 3.00

Larger specimen plants, each .....\$4.00 and Up

**EXCELSA PYRAMIDAL (T.O. Excelsa) B&B.** Tall upright pyramidal, compact grower. Dark green foliage. One of the best for a location desiring a tall pointed formal plant. Very desirable as single specimen or used in center of conifer groups. Remains very compact and attractive with age. Our best and most popular pyramidal conifer. Does not turn yellow in alkaline soils.

2 to 3 feet high, each .....\$1.00

3 to 4 feet high, each ..... 1.50

4 to 5 feet high, each ..... 2.00

5 to 6 feet high, each ..... 2.50

Larger specimen plants, each .....\$3.50 and Up

**BAKERS PYRAMIDAL (T.O. Bakerii) B&B.** Similar to Excelsa, except a lighter green color. Well known standard variety.

Same grades and prices as Excelsa.

**BLUESPIRE PYRAMIDAL (T.O. Howardii) B&B.** An improved type of the Baker. Slight bluish cast in color. A very clean type, stands up well with age. Holds good color in alkaline soils. Very desirable.

Same grades and prices as Excelsa.

**RAMSEY HYBRID (T.O. Ramseyii) B&B.** Dark green, almost feathery foliage. Tall, very slender type which develops into a nice specimen with age. Very hardy. Sometimes used in place of Italian Cypress in colder climates.

Same grades and prices as Excelsa.

**SIKES COLUMNAR (T.O. Columnaris) B&B.** Very slender column type becoming real specimens with age. A clean, very hardy, beautiful plant becoming very popular. The most slender of the Arborvitae. Very graceful.

Same grades and prices as Excelsa.

**CHINESE SEEDLING ARBORVITAE (T.O. seedling)**  
B&B. Tall spreading, fast grower. Used for wind-breaks, screens, etc. Very hardy in any location.

3 to 4 feet high, each .....\$1.00

4 to 5 feet high, each ..... 1.50

5 to 6 feet high, each ..... 2.00

Heavier plants, each .....\$3.00 and Up

## CEDARS AND CYPRESSES

**DEODAR CEDAR** (*cedrus deodara*) B&B. Cedar of the Himalyan Mountains, often called spruce and fir trees. Towering pyramidal form, growing from broad base at ground to point at tip. Horizontal branches, graceful, beautiful, silver-green foliage. Very fine for specimen planting. Adds grace and beauty to the finest grounds. Our most beautiful tree.

2 to 3 feet high, each .....	\$2.50
3 to 4 feet high, each .....	3.50
4 to 5 feet high, each .....	4.50
5 to 6 feet high, each .....	6.00
Larger specimen trees, each .....	\$7.50 and Up

**ARIZONA CYPRESS** (*cupressus arizonica*) B&B. A beautiful silvery, bluish-green cypress, spreading pyramidal form, making perfectly shaped specimens. Very hardy. We grow these in pots as they are very difficult to transplant; will add grace and beauty to any lawn.

15 to 18 inches high, each .....	\$ .75
18 to 24 inches high, each .....	1.00
2 to 3 feet high, from pots, each .....	1.25
3 to 4 feet high, each .....	1.50
Larger trees, each .....	\$2.50 and Up

**ITALIAN CYPRESS** (*cupressus sempervirens royali*) B&B. Very tall tree, having a pillar or column effect. Its dark green shaft rising over other evergreens gives a varied skyline. Used equally well on small yards and homes as well as larger ones. Used

at entrances, corners, porch columns, and as single specimen with dwarf spreading Junipers around base, makes a most beautiful group. Our plants are all grafted from specimen stock which will remain true to type. So essential in planting pairs at entrances, etc.

18 to 24 inches high, each .....	\$ .75
24 to 30 inches high, each .....	1.00
30 to 36 inches high, each .....	1.50
3 to 4 feet high, each .....	2.00
4 to 5 feet high, each .....	2.50
5 to 6 feet high, each .....	3.00
Larger specimen plants, each .....	\$4.00 and Up

### MOSTY SILVERSPIRE ARIZONA CYPRESS B&B.

These are grafted plants. They transplant well and will make uniform specimens. One of the most beautiful, silvery Arizona Cypresses grown. Rather compact, narrow, pyramidal growth. A most desirable specimen that attracts attention in any landscape. Our own introduction.

3 to 4 feet high, each .....	\$3.00
4 to 5 feet high, each .....	4.00
Larger sizes, each .....	\$5.00 and Up

### MOSTY SNOW WHITE ARIZONA CYPRESS B&B.

Grafted plants only. This is by far the whitest colored foliage of any plant in our nursery. More spreading in growth than Silverspire and not as compact. Attracts attention above all other specimen plants in the landscape and adored by everyone. Also our own introduction.

Same grades and prices as Mosty Silverspire.

## JUNIPERS

(Trailing and Horizontal Varieties)

**TRAILING SAVIN JUNIPER** (*J. tamarisifolia*) B&B. Dwarf slow grower. Horizontal habit. Foliage short and compact, bright green in color. The best trailing juniper. Used appropriately in rock gardens and for low massing.

15 to 18 inch spread, each .....	\$1.50
18 to 24 inch spread, each .....	2.00
Larger specimen plants, each .....	\$3.00 and Up

**ANDORA JUNIPER** B&B. Grows flat on the ground. Feathery foliage, bluish green in summer, turning purple-plum color in winter. Very desirable for ground cover, rock gardens, etc.

Same grades and prices as Trailing Savin.

**DWARF PFITZER** (*J. Pfitzeriana Nana*). Horizontal, graceful branches, forming a flat, irregular head. Slightly bluish-green color. Slow grower. Used for low groups and massing.

Same grades and prices as Trailing Savin.

**PFITZER JUNIPER** (*J. pfitzeriana*) B&B. Horizontal, graceful branches forming an immense, flat, irregular head of bluish-green color. Very graceful in outline. Smooth foliage. The best and most popular dwarf juniper.

15 to 18 inch spread, each .....	\$1.25
18 to 24 inch spread, each .....	1.75
2 to 3 feet spread, each .....	2.50
Larger specimen, each .....	\$4.00 and Up

(Dwarf Pyramidal Varieties)

**GREEK JUNIPER** (*J. excelsa stricta*) B&B. Very slow, upright dwarf, compact conical shape. Foliage is compact, shiny green color. Very attractive.

15 to 18 inches high, each .....	\$1.00
18 to 24 inches high, each .....	1.50
24 to 30 inches high, each .....	2.00
Larger plants, each .....	\$5.00 and Up

**GOLDSPOT GREEK JUNIPER** (*chinensis*) B&B. Same as above except having bright golden markings on the foliage. Odd and attractive.

Same grades and prices as Greek Juniper.

**DENSA GLAUCA** (*J. Viridifolia*) B&B. Upright, dense, compact, conical growth. Bluish-green, soft smooth foliage. A clean and most beautiful specimen. The very best of the slow growing, pyramidal type Junipers.

18 to 24 inches high, each .....	\$2.00
24 to 30 inches high, each .....	3.00
30 to 36 inches high, each .....	4.00
Larger specimen plants, each .....	\$5.00 and Up

(Tall Pyramidal Varieties)

**BLUE COLUMN CHINESE JUNIPER** (*J. Chinensis Columnaris Blue*) B&B. Quick growing, upright, pyramidal habit, beautiful, sparkling, blue-green color. Very hardy and vigorous on any soil. Becomes one

of the finest specimens with age. Very desirable and will become one of the most popular Junipers for the South.

2 to 3 feet high, each .....	\$3.00
3 to 4 feet high, each .....	4.00
4 to 5 feet high, each .....	5.00
Larger specimen plants, each .....	\$5.00 and Up

**CHINESE SYLVESTER** (*J. Sylvestris femina*) B&B. A unique pyramidal type adapted for southern plantings. Juvenile foliage mixed with mature foliage gives the tree a two-tone color effect.

Same grades and prices as Blue Column.

**CONNART JUNIPER** (*J. Virginia Connarti*) B&B. This variety is one of the leading favorites. It has deep, rich green, rather smooth, whipcord foliage. Unusually attractive.

Same grades and prices as Blue Column.

**DUNDEE JUNIPER** (*J. Virginiana Pyramidaformia Hilli*) B&B. A beautiful, grayish-green in summer. Turns to a rich, purplish-plum color in autumn and winter, found in no other tree. A good grower and very hardy. A beautiful specimen in any planting.

Same grades and prices as Blue Column.

#### (Colorado Silver Varieties)

The following are the most beautiful and attractive Junipers offered in Texas. They are well adapted to foundation plantings if kept sheared or trimmed, and to general landscape plantings. They are clean, hardy to heat, cold, drought, adapted to most all soil conditions and are not troubled by insects and diseases. All plants offered are grafted and are true to form and color, and will develop into uniform specimens.

**HILLS SILVER** (*J. Scopulorum Hilli*) B&B. Broad, pyramidal and compact in growth. Light, rich blue color. Clean, smooth foliage. Makes a beautiful specimen which always attracts attention.

Same grades and prices as Blue Column.

**SILVER RADIANCE** (*J. Scopulorum Mostyii*) B&B. An improved variety of the Hill Silver, being brighter in color especially during the winter. This variety was originated in our nursery near Kerrville.

Same grades and prices as Blue Column.

**SILVERGLOW** (*J. Scopulorum Silverglow*) B&B. More narrow and upright in growth. A beautiful, shining, silver color at all seasons. Also has the same clean, smooth, whipcord foliage of Hills Silver and Silver Radiance.

Same grades and prices as Blue Column.

**BLUE ALLIGATOR** (*J. Pachyphlaea*) B&B. This is a hardy tree coming from Arizona. A brilliant, silver-blue color, somewhat dwarf grower, broad at base.

Same grades and prices as Blue Column.

**RED CEDAR** (*juniper virginiana*) B&B. Well known tree. Tall with spreading branches. May be sheared to suit many locations. Very hardy.

2 to 3 feet high, each .....	\$1.50
3 to 4 feet high, each .....	2.00
4 to 5 feet high, each .....	2.50
Larger specimen trees, each .....	\$3.50 and Up

**RED CEDAR** (*juniperus virginiana*) B&B. Same as above except sheared to pyramidal form.

Same grades and prices as Red Cedar.

**TEXAS RED CEDAR** (*Juniperus pinchoti*) B&B. More dwarf than *Virginiana*. Holds a bright green color all through the winter. This is our native Cedar. Plants sheared to pyramidal forms.

Same grades and prices as Red Cedar.

## FIR AND PINES

**FIR CHINESE** (*Cunninghamia Lanceolata*) B&B. Tall slender in growth. Foliage very spiny. This is a new and very rare specimen. Odd and very attractive.

18 to 24 inches high, each .....	\$2.00
2 to 3 feet high, each .....	4.00
Larger sizes, each .....	\$6.00 and Up

**PINE ALLEPO** (*Pinus Halepensis*) B&B. A rapid growing pine, medium long needles. Light green color. Suitable for black soils and dry climates. Not hardy in the colder parts of Texas. Comes from the Mediterranean region.

18 to 24 inches high, each .....	\$2.00
24 to 30 inches high, each .....	2.50
30 to 36 inches high, each .....	3.00
Larger sizes, each .....	\$4.00 and Up

**PINE ITALIAN STONE** (*Pinus Pinea*) B&B. Makes a dense, broad, heavy cone-shaped tree, one of the most handsome pines grown. Comes from Italy.

Same grades and prices as Aleppo Pine.

**PINE NUT** (*Pinus Pinon*) B&B. A native of Southwest Texas and as far as Arizona. The pine the Indians gathered nuts from for eating. Very slow grower, extremely hardy and attractive.

18 to 24 inches high, each .....	\$3.00
24 to 30 inches high, each .....	4.00
Larger sizes, each .....	\$5.00 and Up

## DESERT AND SEMI-ARID PLANTS

### CENTURY PLANTS, SOTOL, YUCCAS, GRASSES

Used in plantings on grounds where Spanish, desert or arid effects are desired. On certain types of architecture and locations, a few of these may be used very sparingly. Varieties listed are all grown under our climatic conditions and will be found perfectly hardy.

**CENTURY PLANT** (*agave americana*) B&B. Very large, fleshy leaves. Large heads of flowers on large, tall stems, often 20 feet high.

Prices: \$1.50, \$2.50 and Up.

**SOTOL** (*dasyliirion texanum*) B&B. A native. Long slender, spiny tooth leaves glossy green; prickles, yellow; a strong grower.

2 to 3 feet high, each .....	\$1.00
3 to 4 feet high, each .....	1.50

**RED YUCCA** (*Hesperaloea*) B&B. A native variety with red flowers. Very attractive and continuous bloomer. Unexcelled for massing.

2-year .....	\$ .75
3-year, heavy clumps .....	1.00

**SPANISH DAGGER** (tree yucca; *y. treculeana*) B&B. Has large trunk like tree; large head of stiff bayonet leaves; white flowers borne on very large heads.

2 to 3 feet high, each .....	\$2.00
3 to 4 feet high, each .....	3.00
Larger sizes .....	\$4.00 and Up

**PAMPASS GRASS** (*cortaderia argentinia*) B&B. Well known grass with silvery white plumes.

Medium clumps, each .....	1.00
Larger clumps, each .....	\$2.00 and Up

**BASKET GRASS** B&B. Evergreen bunch grass, dark green, long, round leaves. Very graceful. Indispensable in groups of native shrubs.

Same grades and prices as Pampass Grass.

**PALMS** (*Washington Filefera*) B&B. Fast grower, large leaves. Leaves killed at low freezing temperatures. The hardiest palm we grow.

18 to 24 inches high, each .....	\$1.00
Larger sizes, each .....	\$2.00 and Up

## HEDGE PLANTS

**AMOR RIVER PRIVET** (*Ligustrum Sinense*) N.B. Best quick growing hedge. Small leaves. Graceful without shearing, or may be sheared to any size or form. Plant from twelve to eighteen inches apart for hedges.

	Dozen	100
18 to 24 inches high .....	\$1.00	\$5.00
2 to 3 feet high .....	1.50	8.00
3 to 4 feet high .....	2.00	10.00

For heavier B&B plants, see page —

*Scene to be screened*

*View after planting*

**JAPAN LIGUSTRUM** (*Ligustrum Japonica*) N.B. Large heavy glossy green foliage, white flowers in June,

followed by blue berries in winter. Vigorous and fast grower. Used for heavy plantings, screens, windbreaks, etc. Also may be kept sheared to any size hedge. Stands alkaline soils and holds a good rich color. Plant from 18" to 4 ft. apart for hedges and windbreaks.

	Dozen	100
18 to 24 inches high .....	\$1.25	\$7.50
2 to 3 feet high .....	2.00	12.00
3 to 4 feet high .....	3.00	20.00

For heavier B&B plants, see Page 9.

#### **CALIFORNIA PRIVET (*Ligustrum Ovafolium*) N.B.**

Same grades and prices as Amoor River Privet.

#### **BIRD OF PARADISE (*Poinciana Gilliessi*) N.B.**

For description, see flowering shrubs on page —

2 to 3 feet high .....	\$20.00 per 100
3 to 4 feet high .....	30.00 per 100

For more elaborate hedges, screens, windbreaks and backgrounds, we recommend the following:

DWARF OR POLYANTHUS ROSES on Page 26.

## **ORNAMENTAL DEPARTMENT**

All stock listed on the following pages is express prepaid by us.

### **ROSES**

We list here the choicest varieties known today. All of our plants are field grown and hardy. These plants have all bloomed the past summer and will bloom the first spring after planting. All are ever-blooming. They are the best of the tea roses and everblooming hybrids.

### **HOW TO PLANT**

Always plant bushes deeper than they stood in nursery row and cut off tops within six inches of the ground after planting. After watering well, mound up around plants with loose dirt. Roses are surer to grow if planted this way in December, January or February, and will grow off faster than roses planted later. Our roses are grafted on hardy root stocks, especially adapt-

ed to black or heavy soils, which makes them superior to roses budded onto certain other root stocks. Prices, except noted otherwise:

	Each	Dozen	100
Medium 2- year plants.....	\$ .25	\$2.50	\$17.50
Best 2- year plants .....	.40	4.00	25.00

### EVERBLOOMING RED VARIETIES

**ETOILE DE HOLLAND**—Deep intense velvet red. Large, handsome in bud and open flower; very hardy, strong grower; a favorite with everyone.

**E. G. HILL**—Very large, brilliant red handsome blooms; better than the American Beauty, upright strong grower; ever-blooming.

**C. K. DOUGLAS**—Very fragrant, long buds, large flowers; is a bright crimson scarlet.

**GEORGE PERNET**—Dark rose pink, globular buds, opening into immense blooms; one of the best.

**RED RADIANCE**—Beautiful, extra large, perfect buds and blooms of a lovely red, borne on long stems; strong and vigorous grower; very resistant to disease; hardy. The best and most popular red rose grown.

**F. S. KEY**—Rich, deep rose color of immense size; beautiful buds and flowers. A good bloomer; sturdy. One of the best for cut flowers, will last a week after cutting.

### SHADES OF PINK EVERBLOOMING

**BETTY UPRICHARD**—Largest size, magnificently formed, deep and double, fragrant, bright rich pink; very hardy plant.

**RADIANCE**—A beauty in bud and bloom. Lovely, bright silvery pink; exceedingly vigorous and disease resistant; very hardy; people always admire this rose when visiting our nursery in the summer. Best pink rose.

**COLUMBIA**—Very large buds and perfect open flower; fragrant clear, imperial pink; free bloomer.

### SHADES OF YELLOW EVERBLOOMING

**LADY HILLINGTON**—Deep, golden, yellow, large pointed buds; grows and blooms abundantly.

**ELDORADO**—Intense shade of golden orange and yellow, brilliant in effect.

**LUXEMBOURG**—A very hardy, well known, rich yellow rose.

### WHITE EVERBLOOMERS

**KANSERIN AUGUSTA VICTORIA**—Creamy white, exquisite flowers; strong, upright grower.

**ANGELUS**—Waxy white, fine in bud and open flower.

## BLENDED COLORS

**TALISMAN**—A rich blending of orange, red, copper and gold. The finest rose grown for beauty, daintiness and loveliness.

### CLIMBING ROSES—EVERBLOOMING TYPE

**CLIMBING PINK RADIANCE**—A perfect rose and a vigorous grower.

**CLIMBING AMERICAN BEAUTY**—Colors rich red, passing to crimson; heavy strong grower; hardy.

**CLIMBING K. A. V.**—Creamy white. Perfect open flower. Strong grower and free bloomer. Climbing Talisman.

### DWARF OR POLYANTHA OR BABY ROSES

**CECILE BRUNNER**—The sweetheart rose. Soft delicate pink, perfect shaped buds and open flowers.

**GLORIA MUNDI**—Small double flowers in clusters. Color dazzling orange-scarlet. Constant bloomer which will be a bright spot in your garden.

**IDEAL**—Compact dwarf grower, rich garnet-red clusters of flowers. A constant bloomer and a favorite.

**KATHARINE ZEIMIT**—Bud and flower small, pure white, borne in clusters. Continuous bloomer.

## FLOWERING DECIDUOUS SHRUBS

We recommend planting principally in groups or masses and for hedges or screens, planting against buildings, along fences and drives, and in every nook and corner. You should also include some of the EVERGREEN class. Crepe myrtle, althea and other summer blooming shrubs will bloom prettier and grow more symmetrically if severely pruned during the winter season.

	Each	Dozen	100
Medium size, 2-year .....	\$ .40	\$4.00	\$30.00
Extra large, 3-year .....	.50	5.00	40.00
Larger specimens .....		\$1.00	and Up

**ALTHEA**—Flowers like roses, blooms all summer, shrub or tree; hardy; colors, red, lavender, pink and white.

**BLUE SPIREA (caryopteris)**—Also called Blue Beard; lavender blue flowers in clusters during summer and fall.

**BRIDAL WREATH (spirea Van Houtte, Reevesiana & Thumbergi)**—The prettiest of spring bloomers; snowy white, very graceful and hardy.

**DOUBLE BRIDAL WREATH (s. prumfolia)**—

**BIRD OF PARADISE**—Upright, spreading shrub, fern-like foliage, large clusters pea-shaped, yellow flowers with long, brilliant red stamens. Very hardy. Deciduous. Used extensively for roadside planting by the Texas Highway Department.

- BUSH HONEYSUCKLE**—Fragrant flowers followed by showy berries. Not a climber. White and pink colors.
- BUTTERFLY BUSH** (*buddleia intermedia*)—See Page 3.
- CREPE MYRTLE**—Very beautiful shrub; profuse and continuous bloomer; grows anywhere; very hardy. Colors: watermelon red, lavender and pink.
- WHITE CREPE MYRTLE**—75¢ to \$1.00 each.
- DEUTZIA**—Flowers double, pure white, tinted with blush, strong, upright; blooms early.
- EVERLASTING SWEETPEA** (*lathyrus latifolia*)—See Page 15.
- FLOWERING ALMOND** (*amygdalus flore pleno*)—Low dwarf shrub, covered with double pink flowers like small roses; blooms very early.
- FLOWERING DOGWOOD** (*cornus florida*)—Well known, beautiful, white flowering shrub.
- FLOWERING PEACH**—Very large, dark red double flowers early in spring.
- GOLDEN BELL** (*forsythia*)—Golden yellow; blooms early.
- HYDRANGEA (P.G. & A.G.)**—Better known than most any other shrub for its most attractive white flowers.
- LILAC**—Sweet scented, delicately colored flowers. Well known shrub; very hardy.
- MOCK ORANGE**—Free blooming, white flowers early in summer.
- PLUMBAGO LARPENTA (Leadwort) B&B**—Deep blue flowers all summer. Low trailing habit. Extremely showy.  
Plants in gallon cans, each .....75¢
- PURPLE LEAF PLUM** (*prunus pissardi*)—Very graceful. Small tree with purplish red leaves.
- SALT CEDAR (Tamarix Africana)**—Tall growing shrubs with feathery, cedar-like foliage. Delicate, bright carmine flowers in long racemes during summer. Adapted to all soils and climatic conditions in Texas. Used extensively by the Highway Department for roadside plantings.
- SCARLET QUINCE** (*cydonia Japonica*)—See Page 6.
- TEXAS RED BUD (native)**—This plant or tree gives color to our hills in early spring. Bright rose or red.
- TENNESSEE RED BUD**—Bright pink.
- WEIGLAS**—Rose pink flowers in great profusion.
- WILLOW, DESERT OR FLOWERING (Chilopsis Linearis)**—Large shrub or small tree. Bears trumpet-shaped flowers during the summer. Well adapted to arid sections and light soils. Also used by the Highway Department.
- VITEX**—Flowers small, pale lilac in slender, panicked erect racemes; foliage assumes autumn tints. Very hardy.

## CLIMBING VINES

Strong Plants, each 50¢; dozen.....\$5.00

**HONEYSUCKLE**—Evergreen, hardy, very fragrant flowers.

**HONEYSUCKLE RED**—Coral Flowers.

**CLEMATIS**—Great profusion of white star-shaped flowers.

**QUEEN'S WREATH**—Immense clusters of rose-colored flower bracts; comes from bulb each year; most vigorous grower. Plant in late spring after danger of frost.

**WISTERIA**—Blue and white; early spring bloomer; hardy.

**TRUMPET VINE**—The genuine Virginia Creeper.

**ENGLISH IVY**—The ivy that everyone knows; an evergreen.

**BOSTON IVY**—Clings to any wall or surface; beautiful autumn tints; not evergreen.

(See Climbing Roses and Grape Vines in their class).

---

## SUMMER FLOWERING BULBS

Prices: \$1.50 per dozen bulbs.

**ANGEL LILIES**—Large blooms, veined red.

**CANNAS**—Green or bronze foliage; flowers all colors.

**TUBEROSE**—Bulbs, 50¢ per dozen.

---

## PECANS AND WALNUTS

We grow the very best EGG SHELL varieties for Texas planting. The pecan will grow and bear well on any soil even though it is shallow, if the soil is well enriched and given plenty of water. To do well, the pecan must have its roots in PERPETUAL MOISTURE and its top in PERPETUAL SUNSHINE. It is best to dynamite the holes if the soil is shallow. Our trees are grafted from bearing trees and come into bearing several years younger than the ordinary grafted trees. Pecans should be planted around every home and farm. For yard planting, large size trees are recommended. On large trees, keep the trunk wrapped with paper and burlap the first summer. Soak ground thoroughly once a week and cultivate well.

	Each	Dozen	100
Not branched, 3 to 4 feet.....	\$1.00	\$10.00	\$75.00
Not branched, 4 to 6 feet.....	1.50	15.00	110.00
Not branched, 6 to 8 feet.....	2.50	25.00	200.00
Branched trees, 8 to 10 feet....	4.00	40.00	
Larger trees .....		\$5.00 and Up	

## EASTERN VARIETIES

**STUART**—Best known of the standard varieties. Large nuts; tree sturdy, upright habit; fastest grower, good shade tree, and very prolific.

**SUCCESS**—Large nut, recommended highly; not subject to Rosette or Die Black. Fine for yard planting. Wide spreading tree.

**SCHLEY**—Large, long nut, thin shell, cracks easily. Fine flavor; luxuriant foliage and rapid growth. Beautiful tree.

**DELMAS**—Large nut, plump and well filled; thin shell; heavy bearer. Tree strong and vigorous.

**MAHAN**—Heavy producer of enormous size nuts. Very thin shell. Bears very young. Strong grower. Holds all foliage until frost. A clean yard tree.

## WESTERN VARIETIES

**BURKETT**—Originated by J. H. Burkett, Clyde, Texas. Medium size, short round nut. Fills well, good flavor. Thin shell. One of the best Texas varieties.

**WESTERN SCHLEY**—Medium size, long nut, cracks easily, good flavor; a good Texas variety.

**THOMAS BLACK WALNUT (*Juglans Nigra*)**—One of the largest of the improved varieties and of the best quality. Good cracking quality. The most prolific and abundant bearing tree we have ever grown. We have a tree in the nursery row eighteen months from graft that matured twenty-eight full sized nuts. The tree will thrive and make vigorous growth where the pecan will not grow. Well adapted in every county in Texas to the soils and climatic conditions. Makes a wonderful shade tree.  
Same grades and prices as pecans.

**PECAN AND WALNUT GRAFTING WOOD**—Can supply scions of many varieties at 5¢ each.

## SHADE TREES

Medium, 4 to 6 foot trees, each.....	\$ .50
Large, 6 to 8 foot trees, each.....	.75
Branched, 8 to 10 foot trees, each.....	1.00
Heavy, 10 to 12 foot trees, each.....	2.00
Heavy, 12 to 15 foot trees, each.....	3.00
Larger sizes, each .....	\$4.00 and Up

**AMERICAN ELM**—Broadleaved; faster grower and more handsome than native elm; upright form.

**ARIZONA ASH**—Medium growth; thrives in any soil.

**BOX ELDER (*acer negundo*)**—Very fast grower; beautiful tree making a dense shade.

**COTTONWOOD**—Rapid growth on rich land; well known.

**POPLAR (*Lombardy*)**—Graceful, tall, slender; fine effect.

**UMBRELLA CHINA**—Well known trees. Cut off half of the new growth each year and the wind will not break them.

(The Mulberry is a fast growing shade tree and bears an abundance of fruit. Good for hen yards).

**RUSSIAN MULBERRY**—Best for quick shades.

**NON-BEARING MULBERRY**—Makes a quick shade; long lived.

**CHINESE ELM**—Introduced by the Department of Agriculture. One of the fastest and best growing shade trees.

**SYCAMORE (Platanus Glabrata)**—Tall upright, vigorous grower. Very symmetrical and beautiful. Usually has a strong leader up through center of tree and branches well from this strong body. One of the largest, long-lived shade trees in North America. The variety we grow is a **NATIVE** of Southwest Texas. It will stand alkaline soils, and is **RESISTANT** to the **TEXAS COTTON ROOT ROT**. This makes it one of the most desirable and valuable shade trees grown.

**LIGUSTRUM TREES (Ligustrum Japonica) B&B**—An ornamental, evergreen shade tree. Dark green, heavy foliage. White flowers in June followed by blue berries in winter. Medium size tree, very dense shade. Very attractive. Used extensively on lawns and along drives or as street trees.

6-foot trees, each .....	\$1.50
8-foot trees, each .....	2.00
Larger sizes, each .....	\$3.50 and Up

**LIVE OAK TREES (Quercus Virginiana) B&B**—We have the Central Texas type, which is a much faster grower than the native West Texas Live Oak.

5 to 6 feet high, each .....	\$3.00
6 to 8 feet high, each .....	4.50
Larger trees, each .....	\$6.00 and Up

For other varieties of shade trees, see

**NATIVE RIVER CYPRESS**—Tall, fast growing tree, small fern-like leaves, attractive autumn color, very graceful.

5-6 ft. B&B .....	\$2.00
6-8 ft. ....	3.00
Larger sizes .....	\$4.00 and Up

**WEeping WILLOW (Pendula)**—Well known tree, very graceful, fast grower.

5-6 ft. NB .....	\$ .75
6-8 ft. ....	1.25
8-10 ft. ....	2.00
Larger sizes .....	\$3.00 and Up

## FRUIT DEPARTMENT

### HOW WE CUT OUR BUD WOOD

All our fruit trees are grown from Bud Wood selected from heavy bearing trees. We travel hundreds of miles every year selecting our propagating scions from the best bearing trees in orchards of this part of Texas. It is the general practice of nurseries to cut their Bud Wood year after year from trees growing in the nursery rows. Very few practice Bud Selection from vigorous, heavy producing trees in the orchards.

Before placing your order, ask the nurseryman just how he selects his propagating scions. The characteristics of the parent has the same influence on the young trees which are propagated from it as is true of poultry, livestock, etc.

### PEACHES

We grow and test hundreds of varieties and offer you only the best bearing varieties in this list.

For the country from San Antonio south, while other varieties are also profitable, we recommend especially the Angel, Jewel, Honey, Pallas, Best May and Luttichau, as these are the surest and best bearers.

From San Antonio north, the above are not to be recommended except Pallas and Best May.

High locations are preferable to bottom lands for peaches. Do not plant trees too close together in the orchard. The mid-season and later varieties are best for canning and preserving.

	Each	Dozen	100
2 to 3 feet high .....	\$	\$	\$15.00
3 to 4 feet .....	.30	3.00	20.00
4 to 5 feet .....	.50	5.00	30.00
5 to 7 feet .....	1.00	10.00	60.00

### MAY RIPENING

**BEST MAY**—A very promising extra early peach; freestone.

**MAYFLOWER**—Large, red, semi-cling; best quality; heavy and sure bearer. Vigorous grower.

**LUTTICHAU**—A new variety in demand south of San Antonio. Early. White freestone, touched with red. Same type as Pallas. June 1st.

### JUNE RIPENING—IN ORDER OF RIPENING

**JEWEL, HONEY and ANGEL**—Bears heavy in South Texas. Very sweet and juicy. White freestones.

**MAMIE ROSS**—Large semi-cling, white flesh.

**CARMAN**—Big, handsome, highly flavored, free. Late bloomer, heavy bearer, vigorous tree. This is one of the very best peaches we offer. Sure bearer.

**PALLAS**—Sweet as the Honey but larger and later ripening. Also a later bloomer. Bears well here and prolific farther south. One of the very best market peaches for the South Texas planter.

**LEONA**—Well known, yellow, freestone.

### JULY RIPENING

**J. H. HALE**—Highly recommended by originators; extra large, yellow, freestone.

**EARLY ELBERTA**—Ripens 10 days earlier than the Elberta.

**ELBERTA**—Most popular peach grown for eating, canning and shipping; large, yellow, freestone. Tree vigorous grower.

✓ **FRANK CLING**—Like Elberta, but a highly flavored cling. Will produce five bushels to one Elberta. Ripens a few days later. The surest and most abundant peach we have.

**HOBSON CLING**—Best white cling for sweet pickles and preserves. Sure and heavy bearer. Last of July.

## AUGUST RIPENING

**CARPENTER**—A fine, rich, juicy, red cling, very prolific and of the best quality. Sure bearer.

**KATY**—Highly colored, red, very attractive, large and very prolific, good flavor. Freestone.

**LATE ELBERTA**—Large, yellow freestone, finest flavor, firm, good shipper. Sure bearer and very productive. Tree vigorous grower.

**BARBARA**—Large, fine flavored, yellow peach, sure bearer and very productive. Fine for market and home use. Firm meated. Vigorous tree.

## PLUMS

No finer fruit for preserves, jams and jellies and no trees will grow faster and bear younger. The Advance, Bruce, Excelsion, Burbank and Wickson are very profitable market plums for south of San Antonio. For sandy soil, we grow these on plum roots especially adapted to deep sand.

Same grades and prices as peaches.

## VARIETIES IN ORDER OF RIPENING

**METHLEY**—Introduced by the U. S. Department of Agriculture from South Africa. Large, greenish-red, with brilliant red flesh, finely flavored. One of the very best early plums for the South. Ripens in May.

**BRUCE**—Large, red, early plum; productive and a good seller. Tree vigorous and hardy.

**SANTA ROSA**—Large, deep rich purple when ripe; firm, good shipper; tree fast, upright grower.

**SATSUMA**—Blood red flesh, large, firm. July first.

**BURBANK**—Large, firm, red with yellow meat; youngest and heaviest bearer; not subject to any worms; tree a good grower. Weeping habit. Our surest plum.

**WICKSON**—Largest size; yellow meat, firm, rich flavor; upright grower. Japanese variety. July 15th.

## CHERRIES

Priced same as plums.

**OPATA**—Red, firm yellow meat; late bloomer; good bearer; cherry plum hybrid.

**SAPA**—Small size; late bloomer; prolific.

## PEARS

The pear is one of the surest and most productive of fruit trees, as the blooms will endure the heavy frosts. They require deeper soil than peaches and plums and low, wet places are more suitable. They grow to be very large and are long lived trees. The Leconte, Douglas, Garber and Keiffer are very profitable for market.

Same grades and prices as peaches.

## VARIETIES

**LECONTE**—Medium size, bell shape, mellow and sweet; bears young, very prolific. August 1st.

**GARBER**—Very large, juicy, some acid; excellent for eating; tree tall, robust; last of August.

**KEIFFER**—Large size, very hardy and prolific; best for market and preserves; picked in October; they get mellow and juicy; fine flavor; tree bears young; hardy and blight-proof. September and October.

**DOUGLAS**—Medium size; fine quality; very young and abundant bearer; late bloomer; resistant to blight; a very promising new variety; for the Southwest.

## APPLES

Apples bloom very late and seldom are killed by frost. Some varieties are very heavy bearers, especially the Bledsoe and King David, where conditions are favorable in the country to the north and west of San Antonio. They need deep soil and good cultivation and irrigation.

If you live in the "Hill Country" and have sub-irrigated or irrigated lands, these later, as well as the summer varieties, will do well. We know trees in Kendall, Gillespie, Bandera, Kerr and other counties that are very old and are still heavy bearers.

Same grades and prices as peaches.

## VARIETIES IN ORDER OF RIPENING

**BLEDSON**—Our youngest, best and heaviest yielder; very large, of fine quality; tree vigorous. Ripe in August. We have a 10-year-old tree in our nursery from which we gathered 12 bushels of choice fruit.

**KING DAVID**—Medium size, dull red; best variety to the South; bears very young. This and the Bledson should be in every home orchard.

**DELICIOUS**—Well known variety and has proven to be successful here.

**GOLDEN DELICIOUS**—Same as delicious except color.

**GANO**—A good late fall apple. Very productive.

**TRANSCENDENT**—Crab apple, round, yellow shaded with red; early and abundant bearer; fast grower; nothing better for pies, jellies and apple butter.

## APRICOTS

The yard is the best place for apricots. They make pretty trees and bear better if not cultivated. Trees are fast growers. Ripen in June.

Same grades and prices as peaches.

## VARIETIES

**ROYAL**—Has borne well.

**CLUSTER**—Grows well; bears young; late bloomer.

**KERR**—Large, good quality; robust tree.

## FIGS

Figs grow and bear well if the soil is rich and there is plenty of moisture. Drouth often causes the fruit to drop off. Plant on the **north** side of buildings.

	Each	Dozen	100
Best 2-year .....	\$ .50	\$5.00	\$35.00

**CELESTIAL**—Small but very sweet; bluish color; very productive; stands cold well.

**MAGNOLIA**—Very large, rich straw color; the most profitable variety for the southern part of Texas.

**GREEN ISCHIA**—Large, sweet; greenish white color; fast grower.

**BROWN TURKEY**—Large, very sweet; nearly ever-bearing. Bears very young; will bear fruit the first summer after planting. Very hardy and robust.

## PERSIMMONS

The persimmon does well on heavy or sandy land with plenty of moisture. Hard to transplant, tops should be cut off at 18 to 24 inches and the soil mounded up a foot or more about the tree.

	Each	Dozen
Medium, 2-year, 3 to 4 feet.....	\$ .75	\$7.50
Largest, 2-year, 4 to 5 feet.....	1.00	10.00

## JAPAN VARIETIES

**EUREKA**—One of the most prolific, large varieties.

**TANI NASHI**—Large, almost seedless. Yellow, cone-shaped.

**TRIUMPH**—Bright yellow; tomato shape; medium size.

## GRAPES

Grapes are native to our soil and climate and many varieties succeed well. Grapes bloom very late and often bear full crops when other fruits are scarce. Sandy or soil underlaid with clay are best. The Black Spanish and Herbemont will grow almost anywhere.

	Each	Dozen	100
Strong 1-year plants .....	\$ .20	\$2.00	\$15.00
Strong 2-year plants .....	.30	3.00	20.00

## VARIETIES

**R. W. MUNSON**—Black, very sweet, large berry and bunch; best for arbors and fruit. Ripens July 1st.

**CARMAN**—Black, medium berry, large bunch; very reliable and productive; good grower and hardy.

**RONALDO**—Long, large cluster, white berries, fine for table and market; strong grower.

**EDNA**—Large clusters of large white berries of best quality; the finest white grape we offer. Good grower.

**BLACK SPANISH**—A wine grape but good for grape juice and jellies; grows anywhere; arbor grape.

**HERBEMONT**—Like Black Spanish, but red juice and small sweet berries; fine for arbors. Ripens in August.

## BLACKBERRIES AND DEWBERRIES

Berries are native to our soil and with good cultivation will succeed even without irrigation. Sandy or clay soils are the best. We plant close together in rows wide apart. They come in early when fruit is most relished.

	Dozen	100
Strong, well-rooted plants .....	\$ .50	\$3.50

### VARIETIES

**HAUPTBERRY**—Medium size berry. Blackberry and dewberry cross; most vigorous grower of all.

**DALLAS BLACKBERRY**—Very good; ripens after dewberries.

## STRAWBERRY PLANTS

Strawberries require plenty of water and care. Plant in rows about one foot apart for garden culture. Best to plant these in the fall.

	25	100	1000
Strong, well-rooted plants.....	\$ .50	\$1.50	\$10.00

### VARIETIES

**MISSIONARY STRAWBERRY**—An early variety used extensively for market in the South.

## LAWN GRASSES

**BERMUDA GRASS SEED**—Fancy, 10 lbs., \$4.00; 100 lbs., \$37.00.  
Hulled, 10 lbs., \$6.00; 100 lbs., \$57.00.

Hulled seed germinates in less than half the time required for the unhulled or fancy.

Note: These prices are subject to market changes.

**SAINT AUGUSTINE GRASS—SOD (*Stenotophrum Secundatum*)**—This is the true Carpet grass that will grow under trees in dense shade. Makes a beautiful lawn. We offer this in SOD ONLY. This grass does not mature seed and must be propagated from sod. The Carpet grass seed offered by seed houses is not the true Saint Augustine.

Sod cut in solid blocks one foot square.

Per square yard .....\$1.50

For larger quantities, ask for quotations.

Note: We grow our own San Augustine sod here in our nurseries.

## CHEMICALS AND FERTILIZERS

We handle standard brands of chemicals for spraying purposes and a complete line of fertilizers and plant foods. We will mix plant foods which are especially adapted to your soil conditions and the plants to be fed, if you so desire. Usually we get better results from a mixture made to order than from commercial mixtures.

We handle the complete line of Destruxol products, manufactured by the Destruxol Corporation, Ltd., Pasadena, California.

All chemicals and fertilizers at customary prices.
